The search reports for corresponding French patent application 0215741 and corresponding European patent application 03022092 (both search reports dated March 1, 2004) are submitted herewith. The search reports are identical. The references identified in the search reports are listed on the enclosed PTO Form 1449 with the following exceptions. WO 95/12581 has been substituted with U.S. Patent 6,046,340, which is the corresponding U.S. national stage patent. WO 94/19325 has been substituted with U.S. Patent 5,792,784, which is the corresponding U.S. national stage patent. The substitution was made because the published international applications are in French.

An additional document, RU 2,217,196, is listed on the PTO Form 1449 and is not among the references cited in the French and European search reports. RU 2,217,196 is on its face the published counterpart of the priority document of WO 03/072124, the latter being listed in the search reports. Both RU 2,217,196 and WO 03/072124 are in the Russian language, although both include English abstracts.

Respectfully submitted,

MARIE-CHRISTINE SEGUIN
